How to create a full deployment of Bizagi BPM Suite on Azure

Now you can easily create a full deployment of Bizagi BPM Suite on Azure (virtual machine in Azure).

Before starting you have to:

- Create an Microsoft account and an Azure subscription

If you do not have an Azure subscription, you can get a free one-month trial.

Then, follow these simple steps to create it:

1. Having signed in with Microsoft Azure, visit the marketplace of Azure clicking here.
2. Click on Create Virtual Machine.
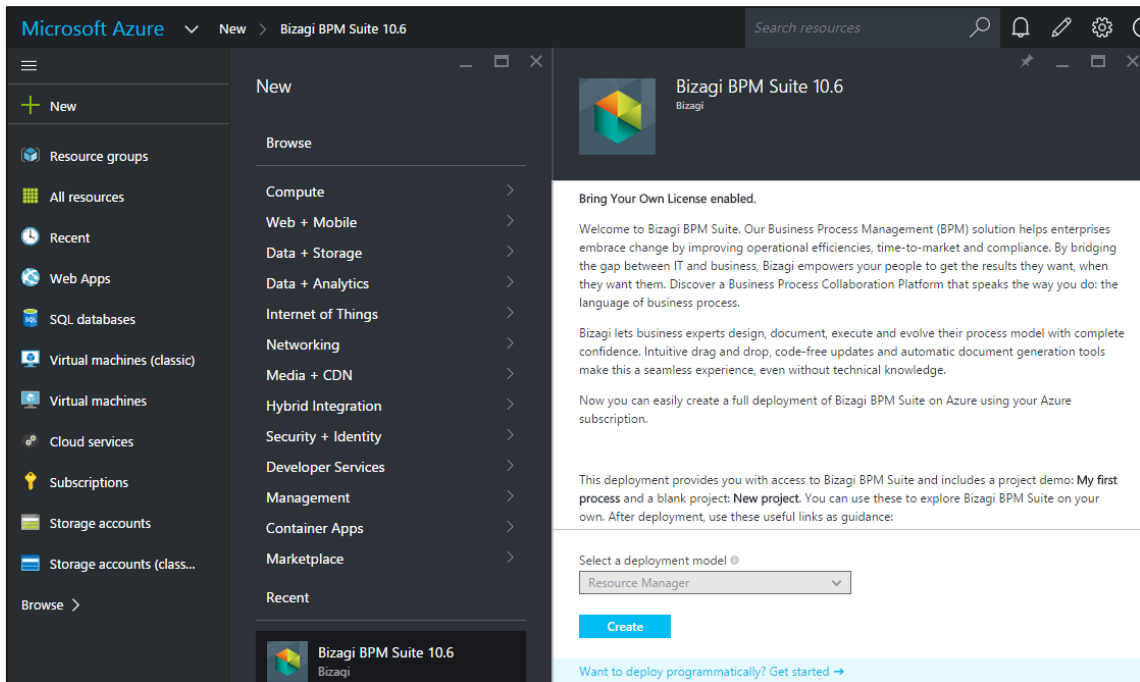

3. Click on Create.

4. Include the Basic information. You can select the Name of your machine, User name and Resource group. Click on OK.
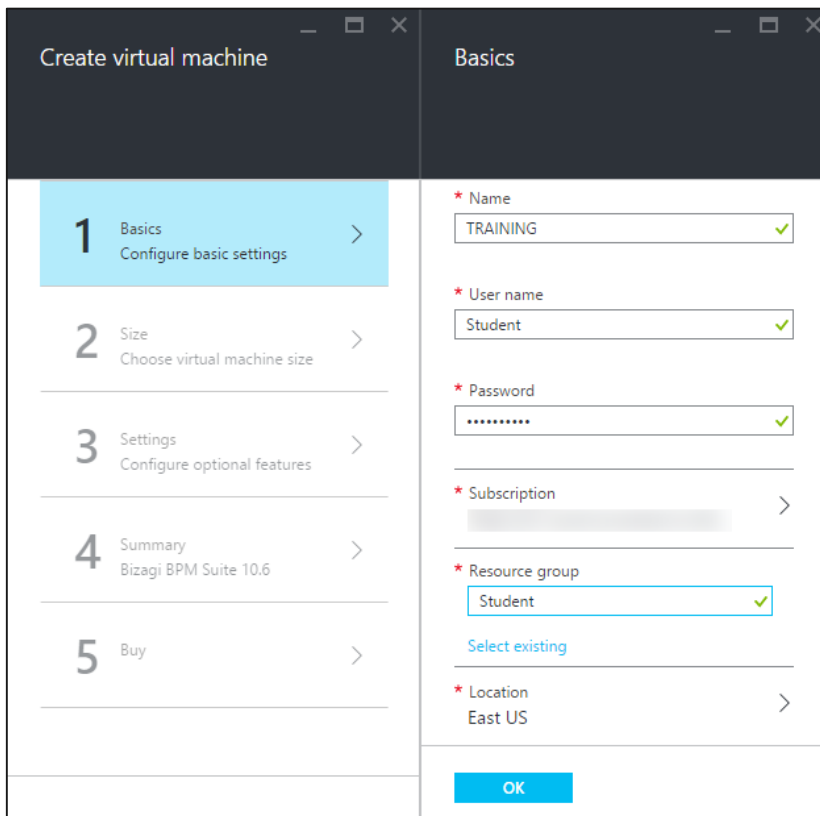

5. Choose the size of your machine.

6. The Settings step is optional. Click on OK.

7. This is the summary. Click on OK.

8. Then, click on Create.

9. You will see that Microsoft Azure is deploying Bizagi BPM Suite. The creation of the virtual machine will take some minutes.
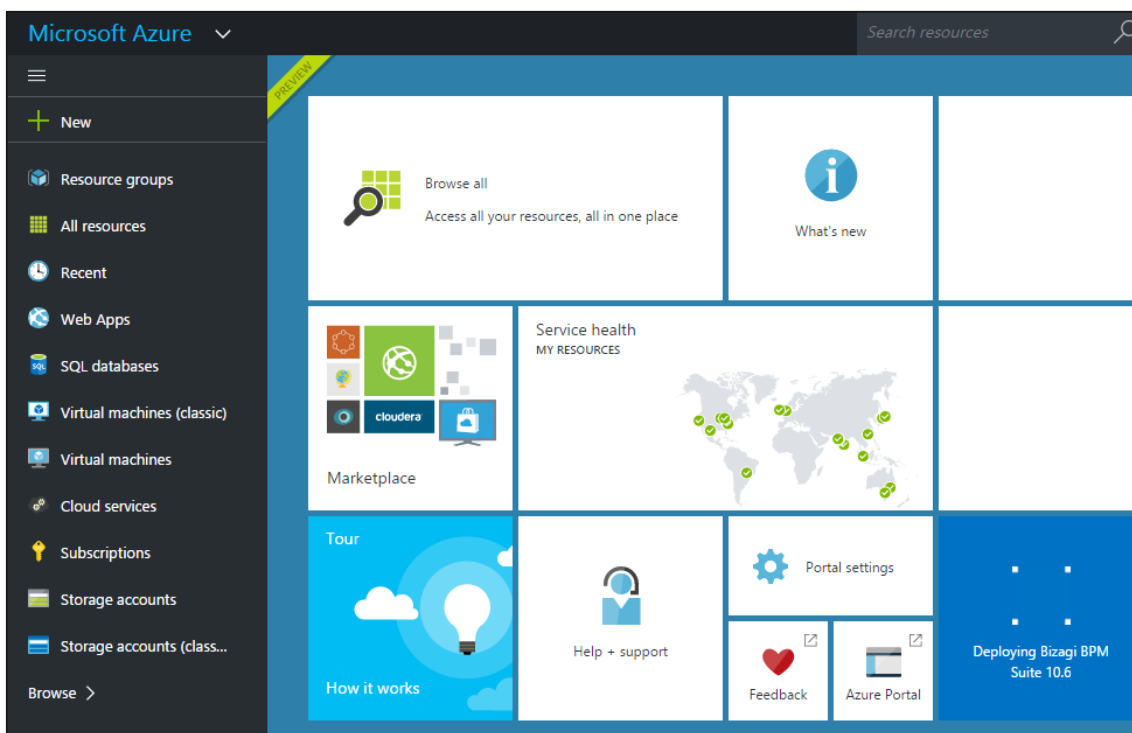

10. After finishing the deployment, you will see you virtual machine under the Virtual machines option. You can identify your machine by its Name.
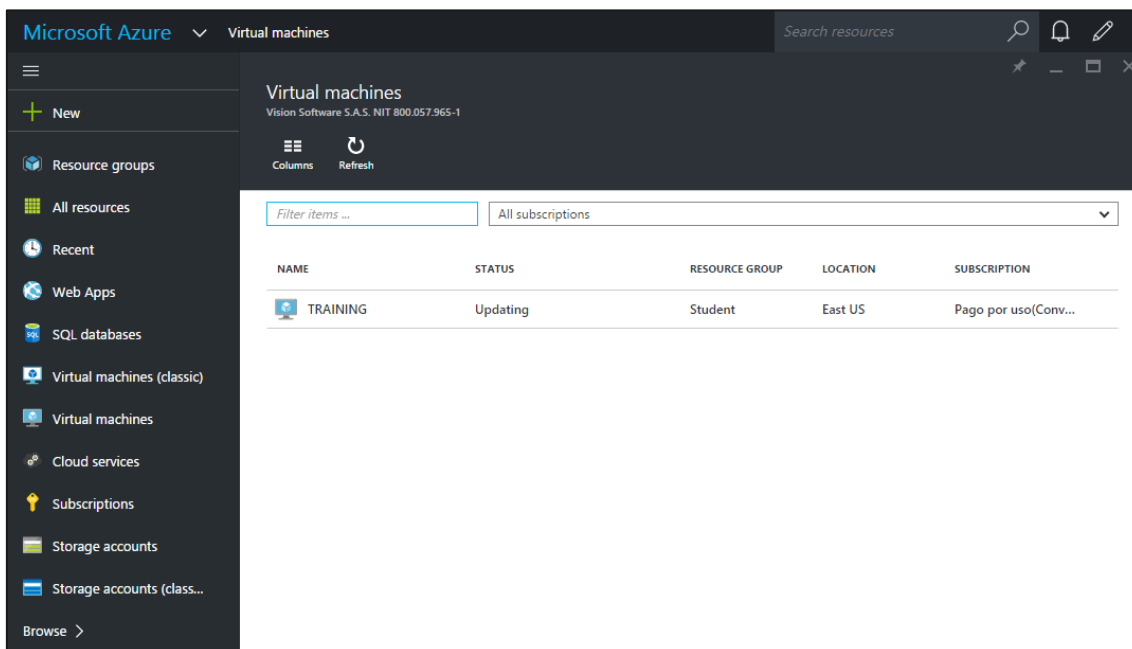

11. Click on the virtual machine and then on Connect. A RPD (Remote Desktop Connection) file is downloaded.
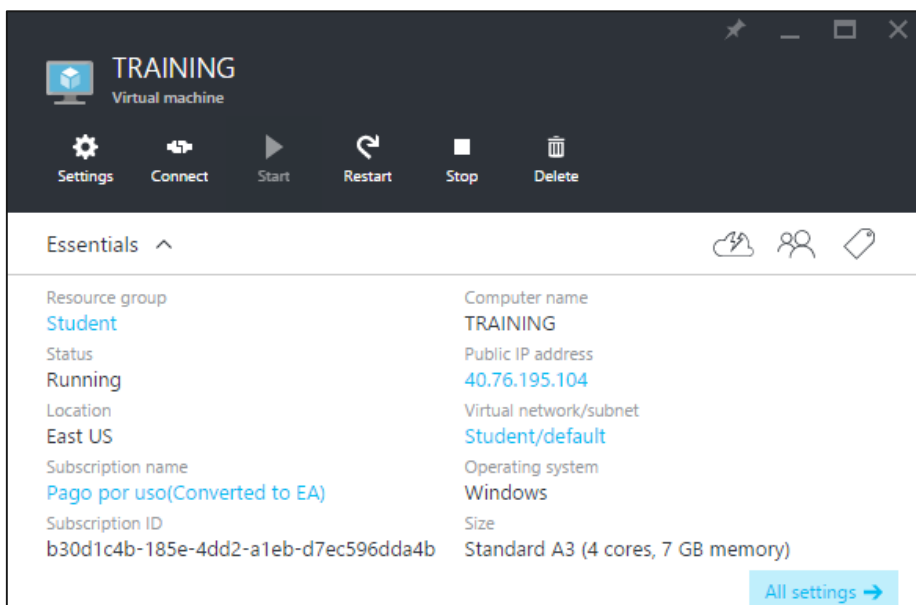

12. Double click on this RDP file and click on Connect.
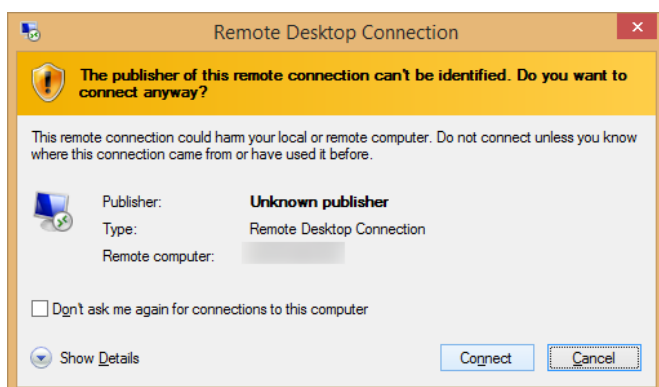

13. Enter your credentials configured in the step number 4.

Confidential
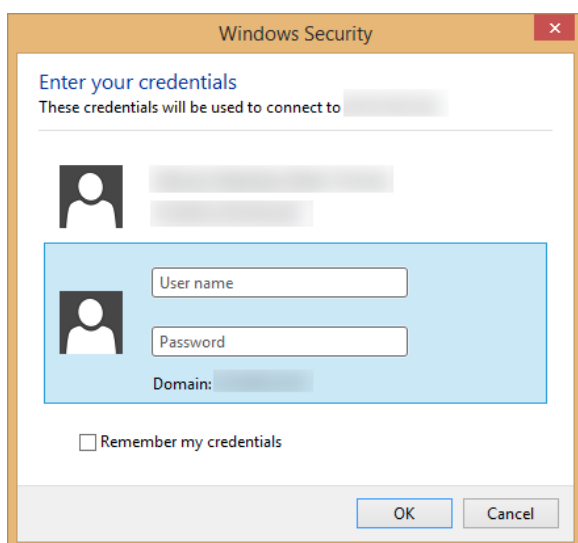

In this virtual machine, you will find Bizagi BPM Suite installed. This deployment provides you with access to Bizagi BPM Suite and includes:

    a.   A project demo: My first process
    b.   A blank project: New project

After deployment, use these useful links as guidance:

- Product documentation: check out the Studio & Engine Help Portal and get all the assistance you need
- Free self-paced courses – eLearning site: take a series of online courses at your own pace to learn how to model and automate business processes using Bizagi BPM Suite
- Forum: Tap into the Bizagi Studio Community Forum to get the most out of your BPM experience
- My first process: for a quick product overview and evaluation, we have created a practical exercise that show how Bizagi works
